SUMMARY

Self-motivated and multi-lingual professional with over 9 years of experience. Proven ability to develop web applications using HTML, CSS, JavaScript, Node.js, React, MySQL, and others. Looking to strengthen my knowledge in web development and software engineering.

EXPERIENCE

Full Stack Developer

Skills Lab.

February 2023 - Present, New York, NY

- Currently developing an integrated full-stack web app catering to dental professionals, using React.js for the front end and Node.js for the back end.
- Actively collaborating with Product and Design teams to create a customizable, white-label platform.
- Spearheading the implementation of a new feasibility research process during the product Discovery phase to optimize time and resource utilization.

Project Coordinator

CBTV Internacional

March 2018 - March 2020, New York, NY

- Coordinated production logistics, travel, equipment rental, and resourcing management.
- Acted as the central point of contact for external stakeholders and vendors, overseeing logistics and communication.
- Enhanced equipment tracking and utilization, reducing the need for rentals and cutting costs by 25%.

TV Producer

Globo Group

July 2014 - January 2018, Rio de Janeiro, Brazil

- Managed budgets, schedules, and processes for 8 TV shows, overseeing music production, team activities, and logistics while supporting the creative team.
- Developed a precise model for accurate \$1MM+ music media reporting, reducing fines from incorrect royalty reports and conserving resources.
- Improved the media curation process by collaborating with other departments on a library system, enhancing efficiency and saving costs.
- Established cross-departmental communication flow for a 20-person team to streamline collaboration, ensuring on-time project completion.

Project Analyst

Globo Group

December 2011 - June 2014, Rio de Janeiro, Brazil

- Streamlined project management, fostering collaboration, identifying performance improvements, and offering insights for decision-making.
- Efficiently managed resource allocation for 430+ collaborators, achieving a 30% reduction in outsourced producers.
- Implemented an efficient vacation/time-off tracking process, enhancing approvals without project disruptions.

EDUCATION

Web Full Stack Development, Front-End & Back-End

Labenu • October 2022

Associate's Degree, Marketing

Centro Universitário UniCarioca • 2014

PROJECTS

iFuture

<https://github.com/Brunomon2812/iFuture>

- Developed Uber Eats-style app: Order placement, cart management, purchases, info updates, order tracking. Used: JavaScript, React, Axios, Chakra, React-Router.

Labeddit

github.com/Brunomon2812/LabEddit

- Developed a mobile-first social network prototype with registration, login, posts, likes, and comments. Tech stack: JavaScript, React, Axios, React-Router.

SKILLS

Industry Knowledge: Back-End Web Development, Front-End Development, Full-Stack Development, Project Management, Agile Methodologies, Resource Management, Data Analysis

Tools & Technologies: ReactJS, MySQL, Node.js, TypeScript, Git, CSS, JavaScript, HTML5, AWS, API, REST

Languages: English, Portuguese, Spanish
